PROFESSIONAL PROFILE

Ms. Heidi Reichert has 16 years of experience as a statistician/biostatistician, working as a consultant and staff member in the healthcare and epidemiology fields. She also has 11 years of prior experience as an Information Technology consultant in both the private and government sectors.

Ms. Reichert's project experience includes human health studies, child behavioral studies, dioxin exposure studies, program evaluations, clinical trials, observational studies, customer surveys, and literature reviews. She has extensive data management experience with both small and large public and private-use data sets, and she has applied both established and new statistical techniques to evaluate products, processes, and programs. Her instructional experience includes numerous statistical courses and workshops, as well as engagements as an Adjunct Lecturer on statistics.

Ms. Reichert has presented her work at methods conferences, including the American Statistical Association's International Conference for Health Policy Statistics and the Conference on Statistical Practice. She is a co-author on manuscripts published in *Annals of Internal Medicine*, *Infection Control and Hospital Epidemiology*, *Journal of the American Geriatrics Society*, *Journal of General Internal Medicine*, *Blood Advances*, *Journal of Vascular and Endovascular Surgery*, and the *American Journal of Nephrology*.

EDUCATION AND DEGREES EARNED

- 2007 Master of Arts in Applied Statistics
University of Michigan, Ann Arbor
- 1996 Bachelor of Science in Industrial Management
Purdue University, West Lafayette, Indiana

PROFESSIONAL HONORS/AWARDS

- 2020 Guest Lecturer, "Data Visualization," College for Creative Studies, Detroit, MI
- 2009 Outstanding Graduate Student Instructor Award, Honorable Mention, University of Michigan
- 2006 Outstanding Graduate Student Instructor Award, University of Michigan
- 2004 Blue Cross Blue Shield Distinctions: "Simply the Best" Nominee and Information Systems "Unsung Hero" Award

PROFESSIONAL ASSOCIATIONS

- 2010–Present American Statistical Association

SELECTED PROFESSIONAL EXPERIENCE

Conducted analyses and produced regulatory reports for multiple clinical trials in the medical device and nutrition space. Trial experience includes power analyses, SAP development, endpoint analyses, reporting, and DSMB participation.

Performed study design, data management, and analyses of clinical and healthcare cost outcomes for hemodialysis patients using the United States Renal Data System (USRDS) and Medicare claims data. This effort required the combination of data from disparate sources, an understanding of Medicare claims billing and data processes, and the ability to communicate the strengths and limitations of the data sources.

Designed and implemented a technical solution for processing more than 300 digitized survival curves in a large-scale meta-analysis of survival data using R and Stata. Solution used abstracted data to accommodate subgroup analyses directed by characterization of the studies.

Conducted the harmonization and management of data from multiple studies to perform a pooled analysis of growth and tolerance in formula-fed infants.

Responsible for daily interaction with clients and providing consultation on topics such as study design, power analyses, data management, analytic methods, data visualization, and manuscript writing and review.
