PROFESSIONAL PROFILE

Ms. Lauren Bylsma is an epidemiologist with over a decade of experience conducting epidemiologic research in the fields of pharmaceuticals, nutrition, cancer, environmental health, occupational health, and rare diseases. She regularly leads and supports epidemiology studies using real-world data and innovative methodology to fill research gaps and update the state of the science, including natural history studies and patient identification algorithms of rare disease patients. She has conducted dozens of systematic literature reviews and meta-analyses synthesizing scientific literature on human health issues in various therapeutic areas, including oncology, hematology, and rare diseases. Ms. Bylsma is skilled at calculating robust estimates of incidence and prevalence to support regulatory documents, market size projections, or commercialization strategy. She has supported all aspects of epidemiologic study conduct, from study design and protocol development to complex analytical interpretation and manuscript writing. Ms. Bylsma also routinely conducts critical appraisals of epidemiologic evidence using standardized techniques.

Ms. Bylsma has taught public health foundations and capstone courses in the Department of Public Health at Calvin University and has presented work at conferences across research settings, including the American Society of Hematology, European Society for Medical Oncology, Society of Toxicology, National Organization for Rare Disorders, International Society of Environmental Epidemiology, and International Society for Pharmacoeconomics and Outcomes Research.

EDUCATION AND DEGREES EARNED

- 2013 M.P.H, Epidemiology; Certificate in Global Health, University of Michigan School of Public Health, Ann Arbor, MI
- 2011 B.S., Biology, Calvin College, Grand Rapids, MI

PROFESSIONAL HONORS / AWARDS

2011–2013 Dean's Award, School of Public Health, University of Michigan

PROFESSIONAL ASSOCIATIONS

2017–Present International Society for Pharmacoepidemiology

SELECTED PROFESSIONAL EXPERIENCE

Managed systematic literature reviews for topics including osteoarthritis, vascular access efficacy and safety outcomes, second-line treatments of non-small-cell lung cancer, mutation prevalence in metastatic colorectal cancer, use of thrombopoietin receptor agonists in chemotherapy-induced thrombocytopenia, and second-line therapies in immune thrombocytopenic purpura.

Calculated dozens of estimates of incidence and prevalence of various chronic conditions and cancers for epidemiology sections of regulatory submissions of orphan drug applications for the US FDA and EU EMA, including presenting for the EMA's Committee for Orphan Medicinal Products.

Supported natural history studies of patients with cold agglutinin disease and secondary hemophagocytic lymphohistiocytosis using institutional databases.

Used SEER and census-tract data to evaluate historical cancer incidence and mortality in a community near a former manufactured gas plant. Also used SEER data, along with scientific literature, to predict future numbers of U.S. patients with metastatic colorectal cancer that undergo surgical resections.

As project manager, responsible for direct communication with clients, proposal drafting, budget management, project administration, and personnel oversight.
